Getting Started

To start playing Stellar Drive, insert the cartridge into your Atari 2600 console and turn on the power. Use your joystick to move your space vehicle on the tracks. Press the joystick button to jump.

Gameplay

Stellar Drive is an exciting space vehicle driving game for the Atari 2600..Your spacecraft drives through space on two parallel tracks. Your vehicle must jump over Stellar speed bumps, while avoiding Stellar guardian walls and moving Wall robots that appear on the tracks. If you hit an obstacle or drive off the edge of the track, your vehicle will crash and the game will end. To score points, you must drive your vehicle as far as possible without crashing.

Scoring

Your score in Stellar Drive is based on how far you are able to drive your vehicle without crashing. The longer you drive without crashing, the higher your score will be. The game will end when you crash into an obstacle or drive off the edge of the track.

Game Difficulty

As you play Stellar Drive, the speed of your space vehicle will increase, making the game more challenging. To advance to higher levels of difficulty, you must drive your vehicle as far as possible without crashing.

Space vehicle

Stellar speed bumps
